

Missouri P20W Updates

Missouri Department of Higher Education & Workforce Development sent this bulletin at 02/28/2025 03:37 PM CST

MoSCORES Enhancements

The Missouri Department of Higher Education and Workforce Development's [MoSCORES](#) site allows users to search for postsecondary education and training programs across the state, including traditional credit programs, non-credit, and workforce training and technical programs.

MoSCORES is now improved with enhanced search capability, the ability to download search results, and new visualizations displaying enrollment, earnings, and employment outcomes for selected programs.

What Have We Been Working On?

- Shared our progress at several conferences and convenings, including the Missouri Chamber of Commerce's Workforce2030 conference and the Mid-America Association for Institutional Research (MidAIR).
- Incorporated Registered Apprenticeships into the P20W database, enabling connections to other education and training data.
- Continued to finalize policies and procedures for partner agencies and external researchers to responsibly access P20W data and submit project requests.
- Continued to analyze career and technical education outcomes in collaboration with the Department of Elementary and Secondary Education (DESE).

What is P20W?

Missouri is working to link data from preschool / early childhood through K-12 education and all avenues of postsecondary education and training ("Grade 20") into the workforce.

Similar to efforts in many other states, we will be able to use de-identified data in ways that center privacy and confidentiality to better understand how people succeed in their education-to-workforce journey and what programs and policies helped them along the way.

Social and human services data can also be linked to help understand what programs helped residents succeed. The public will also have new tools to make informed decisions about education and training pathways and career choices.
